EDUCATION

University of Exeter (Russell Group) **September 2023 - July 2026**
Bachelor of Science in Computer Science - First Class Honours

- Dissertation: *LLM Driven Game Design: Development and Evaluation of an AI Native RPG Game* - First Class (71%)
- Relevant Modules: Fundamentals of Machine Learning (96%), Computer Vision (87%), Group Software Engineering Project (76%), Nature Inspired Computing (76%), High Performance Computing (75%)

EXPERIENCE

Freelance Software Developer **July 2024 – Present**

- Independently built and delivered full-stack web applications and websites for private clients, translating initial requirements into functional deployed products.
- Managed projects independently from initial concept through development and delivery, generating over £1,000 in project revenue.

Mathematics Tutor (Online) **July 2026 – Present**

- Provide one-to-one IGCSE Additional Mathematics tutoring, planning structured lessons and targeted exam practice around the student's needs.

PROJECTS

LLM-Driven RPG Game **- Final Year Dissertation Project**
Technologies: Unity Game Engine, C#, Google Gemini

- Developed a role-playing game in Unity where an integrated LLM generated dialogue and in-game events dynamically based on player actions and text inputs.
- Evaluated the system as part of a first class dissertation on LLM-driven game design

Ecomon **- Group Software Project**
Technologies: Python, Django, Git, Kanban (Trello)

- Collaborated in a 7 person team to build a Django web application that gamified sustainability by linking digital gameplay to physical recycling bins across the University of Exeter campus
- Developed the product iteratively using Kanban and Github, creating fullstack features such as user accounts, persistent progression and leaderboard systems.

FanClub
Technologies: HTML, Javascript, CSS

- Built a mobile web application MVP for a client's community based football app startup, combining features such as profiles, communities, chats, live fixtures and scores into a single platform.
- Developed the prototype for use in investor pitching, iterating on client requirements to deliver a polished interactive demo.

SKILLS & INTERESTS

Programming Languages: Python, JavaScript, C#, Java, C++, TypeScript
Frameworks and Tools: React.js, Node.js, Flask, Github
Concepts: Microservices Architecture, CI/CD, Machine Learning, Agile Development
Languages: English, Cantonese, Mandarin
Interests: Gym, Cooking, Bouldering
